

RIGHT ANGLE SPEED REDUCER

ALUMINUM CONSTRUCTION

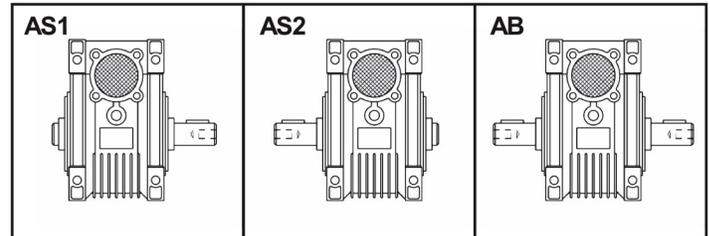

MaxMotion

MOUNTING VERSIONS

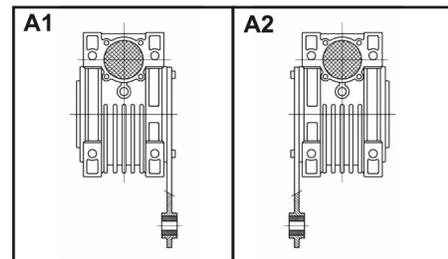

Standard Hollow Shaft Reducer

- Mounting feet on 3 surfaces for universal mounting.
- Machined mounting faces on both output sides with tapped mounting holes.

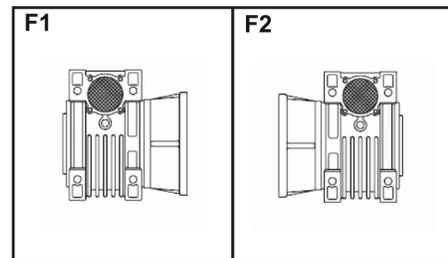

Solid Single & Double Output Shafts

- Plug into standard hollow shaft.
- Easy field installation.

Bolt-On Torque Arm

- Bolts on to reducer machined face.
- C/W With flexible rubber bushing.

Bolt-On Output Flange Adaptor

- Bolts on to reducer machined face.
- Used with hollow or solid shaft.

Features:

- Aluminum alloy Housing with heat sink design
- Two bearings on Input shaft
- NEMA 56C Input
- Double Lip Seals
- O Rings on input and output covers
- Hardened worm shaft
- Permanently sealed with Synthetic lubrication
- Warranty 1 year

Benefits:

- Resists wash down & has higher thermal capacity
- Allows true alignment & prevents oil leaks
- Allows use of standard NEMA motors
- Prevents leaks and avoids oil contamination
- Seals better than paper gaskets
- Increase durability over forged design
- Plug-in solid shafts for greater mounting flexibility
- Maintenance free, no breather or fill plugs
